## SCOPE OF SERVICE:

# PACKAGING

We understand that we are not just packing just a machine but a valuable asset. We adapt the packaging to your specific needs and requirements, whether your equipment is small or large, light or heavy, and is transported by sea, air, or road. We ensure proper and optimal protection of your goods throughout the logistics process for all modes of transport, even accounting for climatic and other logistical requirements. Moreover, in terms of technology, you've made the right choice with **KLOSE**. From hazardous and heavy goods packaging to secure air freight and spare & service part packaging, we deeply understand Industry 4.0 and look forward to pioneering the future of this space. In addition, thanks to our 3D design process, we can provide you with lifelike drawings of the actual packaging and work together to find your ideal solution. ESD-safe, vibration-dampening, anti-corrosion, heavy cargo, and dangerous goods are only a few of the aspects we manage daily.

## PACKAGING SERVICE

**KLOSE** offers a full range of on-site and off-site packaging services with decades of experience with oversized, extremely heavy, and fragile cargo such as high-tech machinery. Our dedicated teams can handle packing your cargo, container stuffing, flat rack lashing, and more, all with certified quality and transparent reports before handover for transportation.

## 3D DESIGN PROCESS

**KLOSE** possesses in-house capabilities to design and manufacture wooden packaging that meets and exceeds our customers' expectations. We employ advanced software solutions to provide lifelike 3D drawings of the packaging and load securing. Upon request, we can even incorporate the cargo. This significantly reduces the time required to identify the best possible solution.

## DID YOU KNOW?

Our Asia-Pacific headquarters in Kuala Lumpur, Malaysia, houses a state-of-the-art woodworking facility for manufacturing customised wooden transport- & export-packaging. Trained woodworkers equipped with the right equipment, such as automated panel saws, oversized table saws, and overhead cranes, can fabricate transport packaging of any size or form. You need an export crate for a 12-meter long and 35-ton heavy laminator? Your crate needs to withstand sea transport and tough weather conditions? You require someone to pack this machine at your facility? No worries, we have you covered!

## OUR SCOPE IN DETAIL

- > Fabricating wooden packaging for transportation via land, air, and sea.
- > Customised industrial packaging solutions, including ESD-safe, anti-vibration, anti-corrosion, and more.
- > Fumigation or heat treatment meeting relevant standards and regulations such as IPPC and ISPM15.
- > Facility disconnection, dismantling, move-out, and machine packaging preparation.
- > On-site or off-site packaging using specialised rigging and packaging equipment.
- > Vacuum packing, including humidity barrier and control devices; Shockwatch/Tiltwatch and more.
- > Arranging transport via land, air, and sea and custom transport solutions for oversized & heavy cargo.
- > Loading of oversized and heavy items on flat-rack or low-loader transport.
- > Lashing and issuing lashing certification as per international transport standards.
- > Container stuffing and load securing against shifting and moving during transport.
- > Contract-based, high-volume packaging of machines and finished goods.
- > Customised packaging solutions for sensitive equipment such as electrical components.
